

CCLayer

<LeapListener>

FingerPaintingScene

```
classDiagram
    class CCLayer
    class LeapListener["<LeapListener>"]
    class FingerPaintingScene
    CCLayer <|-- FingerPaintingScene
    LeapListener <|-- FingerPaintingScene
```

The diagram illustrates a class hierarchy. At the top, two boxes represent the parent classes: 'CCLayer' on the left and '<LeapListener>' on the right. Below these, a single box represents the child class 'FingerPaintingScene'. A horizontal line connects the two parent boxes, and a vertical line descends from its center to the top of the child box. From this vertical line, two arrows point upwards to the bottom of each parent box, indicating that 'FingerPaintingScene' inherits from both 'CCLayer' and '<LeapListener>'.
